

Wright County Courthouse, County Board Room

The Minnesota Department of Health strongly recommends that ALL homebuyers have an indoor radon test performed prior to purchase or taking occupancy and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

Every buyer of an interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place the occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling.

The balance of any special assessments that were levied before forfeiture and canceled at forfeiture are not included in the basic sale price and may be reassessed by the municipality. These special assessments are shown on the list of tax-forfeited land under the column titled "Specials Before Forfeiture."

Persons and entities owing delinquent taxes on other parcels in Wright County will be prohibited from bidding on parcels at this sale.
