

TH 25 COALITION

You are Invited to Attend an

Open House

Tuesday, February 13, 2018

5:00 - 7:00 PM

Monticello Community Center, Mississippi Room
505 Walnut St.,
Monticello, MN 55362

Two of the state's top intersections with high intersection crash costs are within proximity to the existing TH 25 River Bridge.

TH 25 currently carries up to 36,500 vehicles per day, which is approaching capacity and will not accommodate future growth.

Future development plans for the area are expected to add 75,000 people by 2040.

Industrial development being considered in Sherburne County, could generate significant amounts of truck traffic to the area with the likelihood of most of the vehicles destined across the River Bridge to I-94.

About the Open House

The Highway 25 Coalition is asking for community input in creating a vision for the TH 25 Corridor and surrounding area. The main goals of this vision are to improve safety, reduce congestion, and improve freight mobility while encouraging economic development.

This open house will be an informal meeting with information on display for review by the public and interested persons. No formal presentation will be conducted. Open house attendees will have an opportunity to provide input on the information presented. Your voice will help shape the planning considerations for the TH 25 area.

TH 25 Area Study Purpose

The purpose of the TH 25 Area Study is to identify near and long-term improvements that address current and future transportation issues on TH 25 between I-94 and TH 10, and accommodate future community growth in Becker, Becker Township, Big Lake, Big Lake Township, and Monticello. Additional study goals include:

- Gain consensus on locally recommended improvements with Coalition members and public.
- Develop an implementation plan that prioritizes projects and identifies potential funding sources and avenues to secure these funds.
- Further refine future vision into smaller, manageable and deliverable projects.
